Education

VIT Bhopal University, Bhopal, India — Sep 2023 – May 2027
Bachelor of Technology in Computer Science and Engineering CGPA: 8.41

Technical Skills

Languages: Java, Python, JavaScript, TypeScript
Frontend: Java AWT, Java Swing, React, React Native (CLI & Expo)
Backend: Spring Boot, Node.js, Express.js, REST APIs
Frameworks/Libraries: Hibernate, Thymeleaf, FastAPI, Socket.IO
Databases: MySQL,
Tools: Android Studio, Postman, Git, GitHub, VS Code, IntelliJ IDEA
Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Professional Experience

Software Engineer Intern — May 2026 – Jul 2026

DevLabs Technology, Gurugram, Haryana

- Built RESTful services using Spring Boot and MySQL, increasing backend response efficiency by approximately 15%.
- Collaborated in a 4-member Agile team using Git, contributing to sprint planning, code reviews, and feature delivery.

Android Development Intern — Dec 2025 – Feb 2026

DW Innovation Pvt. Ltd., Pune, Maharashtra

- Engineered 4+ mobile modules using Java and React Native, contributing to the delivery of production-ready Android applications.
- Integrated 20+ RESTful APIs with SQLite-based local storage, strengthening data availability and application reliability.

Projects

E-Commerce Platform — Spring Boot [GitHub]

Java, Spring Boot, MySQL, Thymeleaf

- Architected a full-stack e-commerce platform supporting 20+ product listings, shopping cart functionality, and end-to-end order processing.
- Created 10+ RESTful endpoints and secure authentication flows with Spring Boot and MySQL for reliable user and transaction handling.
- Optimized SQL queries and server-side operations, reducing response times by approximately 25% and increasing system scalability.

SuRaksha — AI-Powered Banking Compliance System [GitHub]

Python, FastAPI, React, BERT, LangGraph, Gemini, Pinecone

- Fine-tuned a 110M-parameter BERT classifier to analyze regulatory PDFs and API feeds, achieving a 94.2% F1-score and 98% sensitivity in detecting high-risk compliance anomalies.
- Orchestrated multi-agent compliance pipelines with LangGraph StateGraph, Gemini 1.5 Flash, and Pinecone RAG, cutting manual audit review time by 85% and LLM hallucinations by 40%.
- Engineered a FastAPI service and React dashboard with Celery/Redis for asynchronous ingestion, achieving 95% ticket-routing accuracy through TF-IDF cosine similarity and triggering automated Slack alerts.

PNG Jewellers Admin Portal [GitHub]

React Native, TypeScript, React Context, Node.js, MongoDB

- Designed a mobile dispatch system with 10 administrative modules and 26 screens for vehicle tracking, security guard scheduling, and driver-log administration.
- Created 42+ reusable TypeScript components and custom React Context hooks, reducing code duplication by 30% and simplifying maintenance.
- Integrated live-location maps and reporting utilities to automate payroll exports in PDF and Excel (.xlsx) formats.

Certifications

Oracle OCI Generative AI Professional • NPTEL Machine Learning • HackerRank Python Basics • AIML Certification
