Education

VIT Bhopal University, Bhopal, India — Sep 2023 – May 2027

Bachelor of Technology in Computer Science and Engineering CGPA: 8.41

Skills

Product & Operations: Requirement Gathering, User Stories & Workflow Design, Cross-Functional Coordination, Agile/Sprint Execution, Process Documentation, Data-Driven Reporting, Bottleneck Identification

Core CS: Data Structures & Algorithms, Complexity Analysis, Object-Oriented Design, Operating Systems, DBMS, Computer Networks

Languages: Java, Python, JavaScript, TypeScript

Backend / APIs / Databases: Spring Boot, Node.js, Express.js, REST APIs, MySQL, Distributed/Asynchronous Systems (Celery, Redis)

AI/ML: LLM Agent Pipelines (LangGraph), BERT Fine-Tuning, Prompt Engineering

Frontend: React, React Native (CLI & Expo), Java AWT, Java Swing

Tools: Git, GitHub, Postman, Excel/Google Sheets, VS Code, IntelliJ IDEA, Android Studio

Professional Experience

Software Engineer Intern — May 2026 – Jul 2026

DevLabs Technology, Gurugram, Haryana

- Translated functional requirements into technical specifications and built scalable RESTful services with Spring Boot and MySQL, improving backend response efficiency by approximately 15%.
- Coordinated with a 4-member cross-functional Agile team across sprint planning, stand-ups, and code reviews, owning tasks end-to-end from requirement discussion through delivery.

Android Development Intern — Dec 2025 – Feb 2026

DW Innovation Pvt. Ltd., Pune, Maharashtra

- Partnered with design and backend stakeholders to scope and deliver 4+ mobile modules using Java and React Native, shipping production-ready Android features on schedule.
- Integrated 20+ RESTful APIs with SQLite-based local storage, strengthening data availability and application reliability at scale.

Projects

SuRaksha — AI-Powered Banking Compliance System [GitHub]

Python, FastAPI, React, BERT, LangGraph, Gemini, Pinecone

- Scoped and designed a distributed, fault-tolerant multi-agent workflow with LangGraph StateGraph, Gemini 1.5 Flash, and Pinecone RAG, cutting manual audit review time by 85% and LLM hallucinations by 40% – directly automating an operational bottleneck.
- Built an asynchronous, horizontally-scalable ticket-routing and alerting workflow with FastAPI, Celery, and Redis, achieving 95% routing accuracy via TF-IDF cosine similarity and automated Slack notifications.
- Fine-tuned a 110M-parameter BERT classifier to analyze regulatory PDFs and API feeds at scale, achieving a 94.2% F1-score and 98% sensitivity in flagging high-risk compliance anomalies for review teams.

E-Commerce Platform — Spring Boot [GitHub]

Java, Spring Boot, MySQL, Thymeleaf

- Scoped and architected a full-stack e-commerce product end-to-end, defining workflows for 20+ product listings, cart functionality, and order processing.
- Designed 10+ RESTful endpoints and secure authentication flows with Spring Boot and MySQL for reliable, low-latency transaction handling.
- Optimized SQL queries and server-side operations, reducing response times by approximately 25% and improving system scalability.

PNG Jewellers Admin Portal [GitHub]

React Native, TypeScript, React Context, Node.js, MongoDB

- Defined requirements and designed a mobile operations/dispatch system spanning 10 administrative modules and 26 screens for vehicle tracking, security guard scheduling, and driver-log administration.
- Created 42+ reusable TypeScript components and custom React Context hooks, reducing code duplication by 30% and simplifying long-term maintenance.

Achievements

LeetCode: Solved 100+ Data Structures and Algorithms problems on LeetCode, demonstrating strong analytical problem-solving.

Logitech Hackathon: Selected as a finalist – ideated and pitched a product concept from problem statement to prototype under time constraints.

Honeywell Hackathon: Selected as a finalist – ideated and pitched a product concept from problem statement to prototype under time constraints.

Certifications

Oracle OCI Generative AI Professional • NPTEL Machine Learning • HackerRank Python Basics • AIML Certification
